

THE PERFECT BALANCE OF HARMONY AND PERFORMANCE

Holistic thinking is our path to quality. For this reason we have developed a unique range of made-to-measure repair kits designed to ensure maximum compatibility, precise fitting and easiest installation of the most technically advanced automotive components.

No more half measures:

- Premium quality
- For all leading European and Asian makes and models

MOTOR | CHASSIS | SERVICE

QUALITY IS OUR GOAL
CHASSIS AND STEERING PARTS

STEERING IN THE RIGHT DIRECTION: DIRECTLY TO YOU.

All RUVILLE chassis and steering components are subjected to high demand in a challenging operating environment. Nothing compares to what they have already left behind before being installed: because all RUVILLE parts must pass a series of tests in order to be approved for operation.

Quality that meets the highest standards:

- **OE quality**
- **Certified to BER standards**
- **In collaboration with RWTH Aachen University**
- **In collaboration with Germanischer Lloyd**
- **More than 95 % T and U parts conform to BER 1400/2002**

QUALITY IS MORE THAN THE SUM OF ITS PARTS.

Our customers can rely on RUVILLE parts in every situation – because there's more to safety than product quality alone. It's rather our service, our know-how and the expert advice we can offer that make our parts so unique.

No more half measures:

- **All our products are of OE quality**
- **All our parts are carefully matched**
- **Extremely durable components**
- **These are the qualities that guarantee cost-efficient and trouble-free installation**

OUR STANDARD: IT'S NOT THE PARTS THAT PUT THE CAR IN MOTION. IT'S THEIR QUALITY.

Steering and chassis components are continuously subjected to extreme stress. That's why maximum performance is only one of the basic requirements that a RUVILLE part must meet.

At RUVILLE, we can also offer our extensive know-how and experience as a globally successful aftermarket expert - coupled with product diversity, highly stringent quality standards and an unparalleled range of services. You have our word on it.

Chassis and steering parts by RUVILLE:

- **Rigorous quality controls**
- **Competitive warranty terms**
- **Consistent customer claims management**
- **Surface finishing by means of galvanisation**
